

A Safe Fleet Brand

PRODUCT CHANGE NOTIFICATION

To: Valued Roll-Rite Customers
From: Roll-Rite Product Management Team
Date: May 7, 2021
Subject: Roll-Rite Multi-Flex™ Rear Arm 'Bright Steel' Cable

Change Overview:

This communication is a notice of a change to Roll-Rite Multi-Flex™ Rear Arm product design. Effective immediately, Roll-Rite Multi-Flex™ Rear Arm flex cable will be changed from a 3/4-inch diameter 6/25 dry/clean galvanized cable to a 5/8-inch diameter Bright Steel cable, internally lubricated with 6/36 construction with a 40% tighter bending radius allowance for improved flexibility. The cable cast aluminum housing insert will feature .060" increased inner wall thickness for a stronger assembly with longer life.

Reason for change:

These changes in overall improved design result in increased flexibility for enhanced performance, added strength for durability and longer life, and increased resistance against environmental or corrosive conditions.

There will be no changes to product part numbers, pricing, or lead-time as a result of this product change notification. New component design is completely reverse compatible or interchangeable with previous design. Please review the images below already generated that include these changes.

Warranty Notes:

Roll-Rite will continue to provide warranty service on products within its warranty period.

Response:

No response to this notification is required. Requests for additional information should be directed to your Roll-Rite/Safe Fleet Regional Sales Manager or our Inside Sales Representatives by calling 800-297-9905.
